

**Project Title** : Employees Rent Accounting Software using HTML/CSS & Oracle Database

**Submitted by** : Saranya K

**Department** : Computer Science and Engineering

**Institution** : Vel Tech Multi Tech Dr. Rangarajan Dr. Sakunthala Engineering college

**Academic Year:** 2023-2027

## **OUTLINE OF THE REPORT**

1. Abstract
2. Introduction
3. Objectives
4. Methodology
5. Modules
6. Output Screenshots
7. Conclusion
8. Future Scope

## **ABSTRACT**

This project is developed to manage employee rent and accounting details in an efficient and automated manner. Traditional manual rent tracking systems are time-consuming and prone to errors. This software provides a web-based solution using HTML and CSS for the front-end and Oracle Database for backend data storage. It helps in storing employee details, rent payments, due amounts, and generating reports. The system ensures accuracy, reduces manual work, and improves data management efficiency in organizations.

## **INTRODUCTION**

Managing employee rent and financial records manually is difficult and inefficient in many organizations. Errors in calculation and record maintenance may lead to financial mismatches. To solve this issue, an automated Employees Rent Accounting Software is developed. This system uses web technologies for user interface and Oracle Database for secure data storage. It allows easy entry, update, and tracking of employee rent details.

## **OBJECTIVES**

- To automate employee rent tracking system
- To reduce manual calculation errors
- To store data securely using database
- To generate rent reports efficiently
- To improve accuracy and time management

## **METHODOLOGY**

- Designing user interface using HTML & CSS
- Creating database tables in Oracle Database
- Connecting front-end with database
- Inserting and retrieving employee rent data
- Performing calculations for rent and dues
- Generating reports for management

### **Technologies used:**

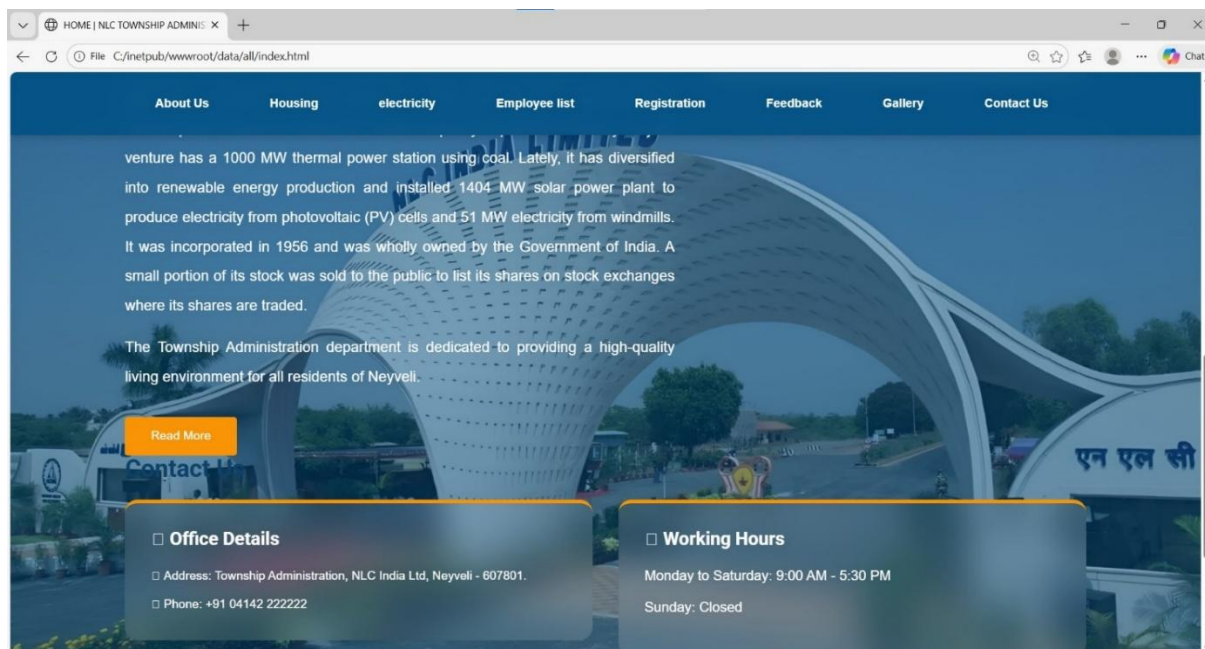

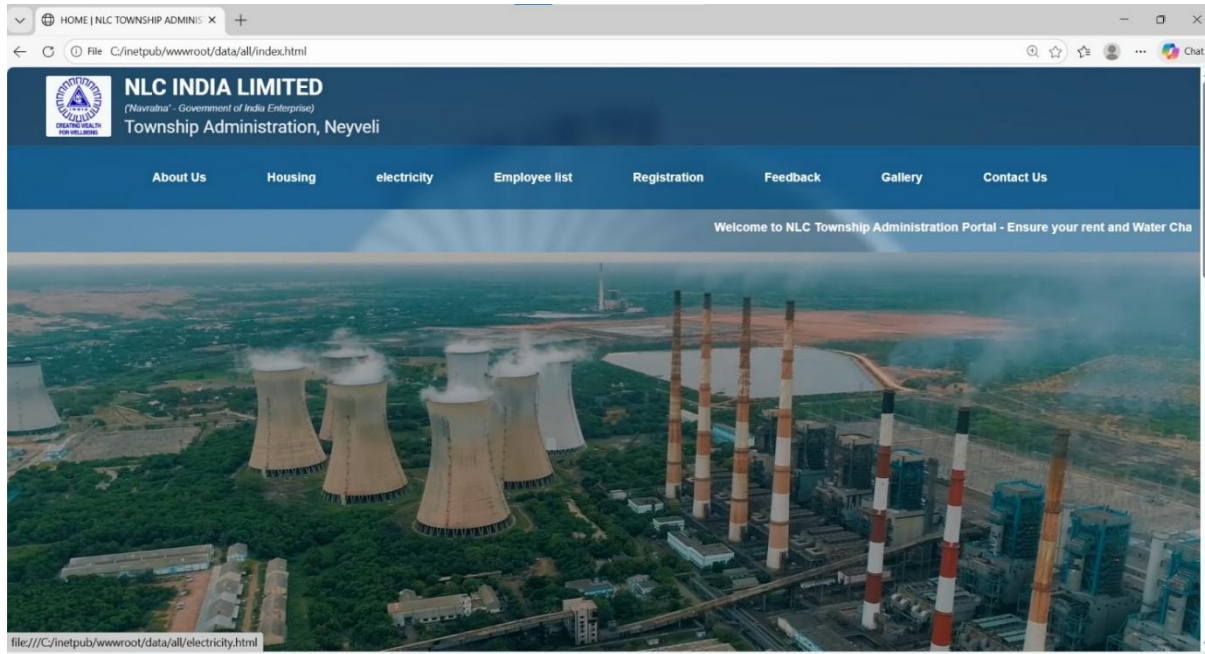

- HTML
- CSS
- Oracle Database
- SQL

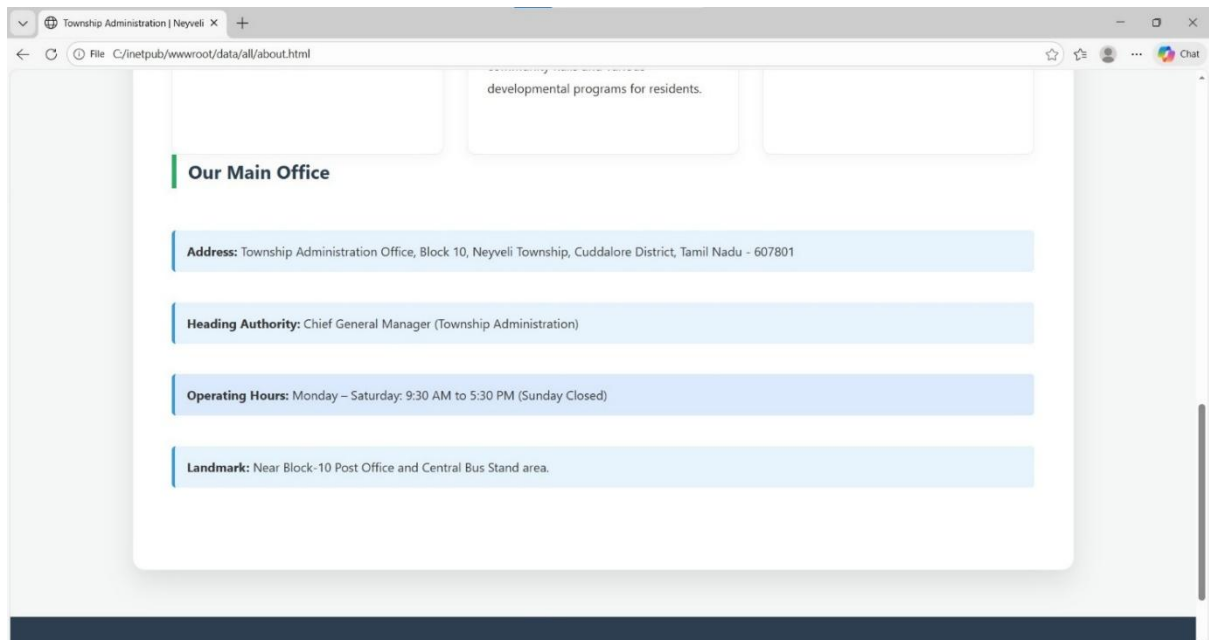

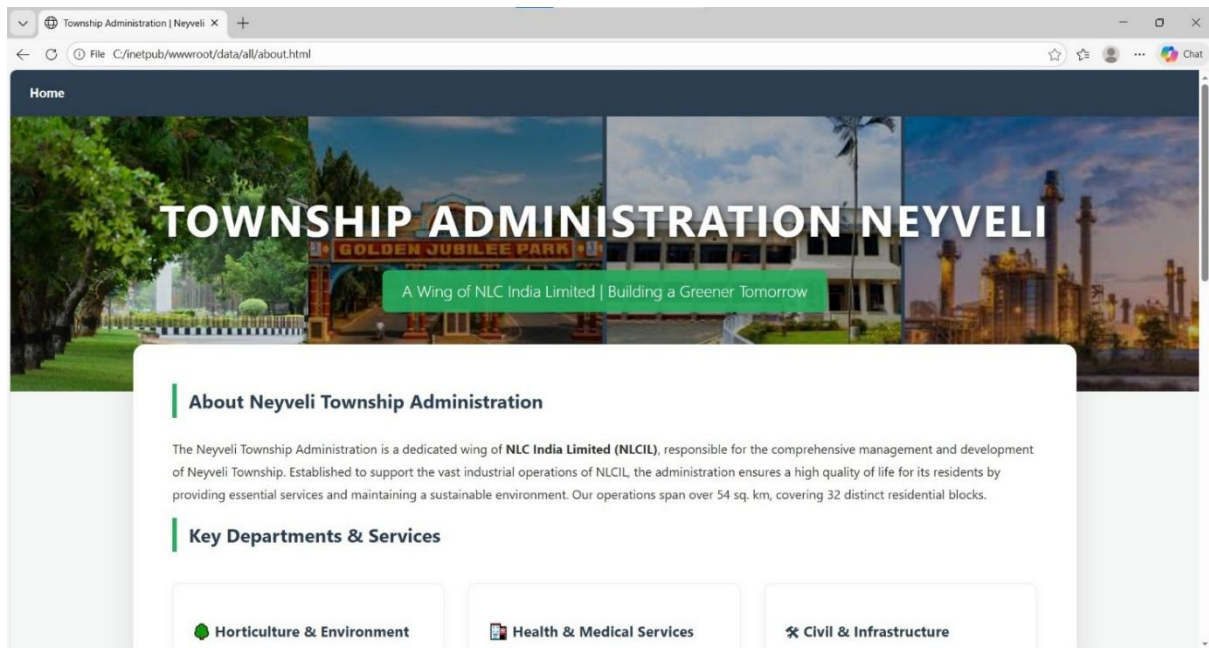

## **MODULES**

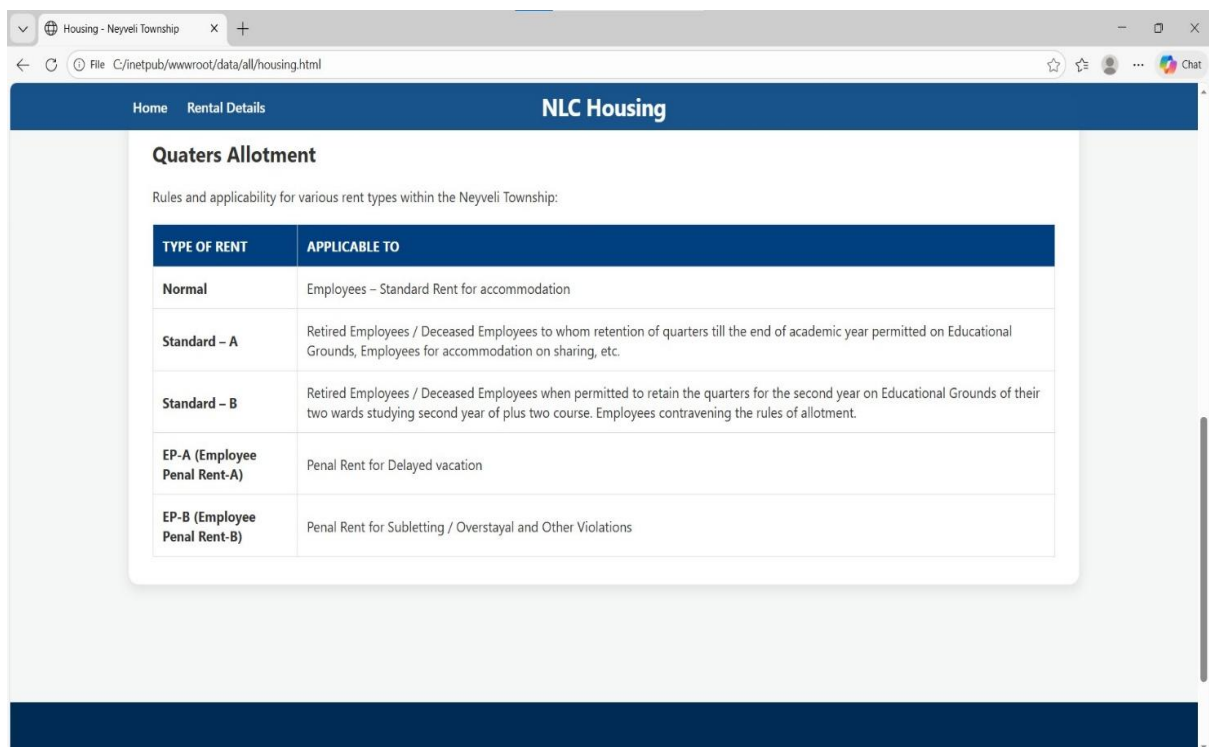

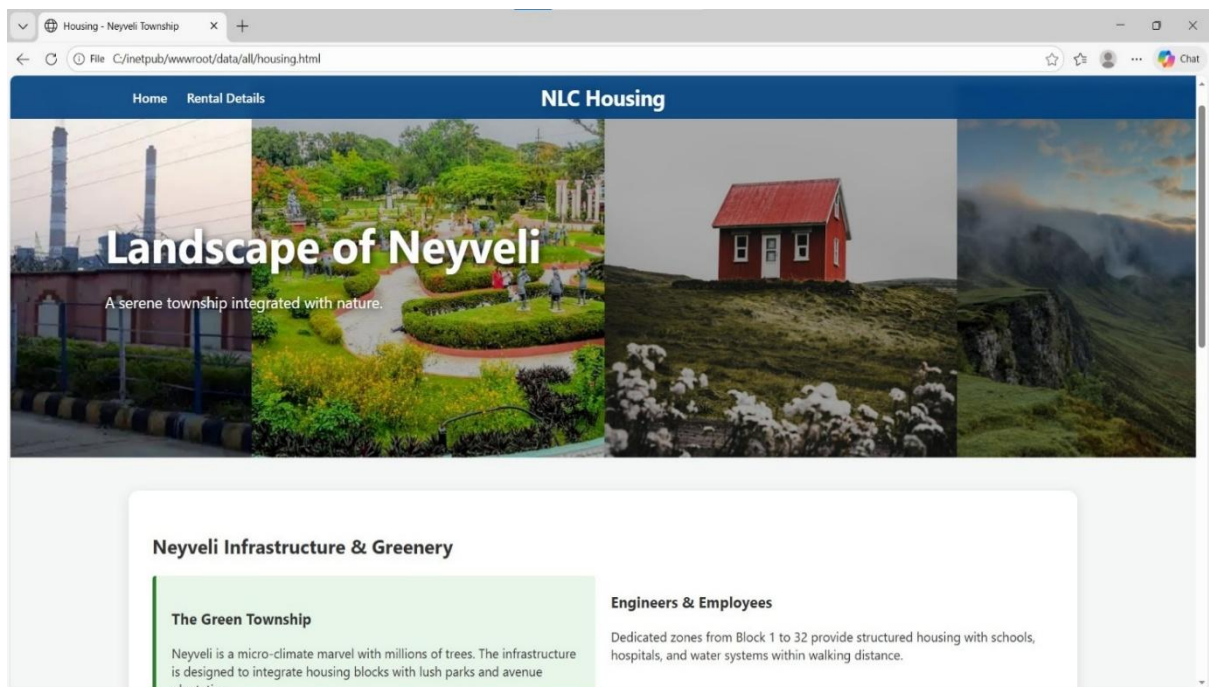

- Employee Registration Module
- Rent Entry Module
- Payment Tracking Module
- Due Calculation Module
- Report Generation Module

- Database Management Module

## **CONCLUSION**

The Employees Rent Accounting Software successfully automates rent management processes. It reduces manual errors, improves data accuracy, and provides efficient record management. The system ensures secure storage of employee financial data using Oracle Database and simplifies accounting operations.

## **FUTURE SCOPE**

- Add payment gateway integration
- Develop mobile application version
- Implement advanced reporting dashboard
- Add email/SMS notification system
- Upgrade UI using modern frameworks like React
